

Peek polish - an eye catcher

Peek polish, the versatile trade polish for professional use, has been relaunched in new retail sizes and in new eye-catching packaging.

Peek polish cleans, polishes and protects, all in one. Its anti-oxidant cleaning properties means that it is effective on most hard surfaces, not just metal. In fact, Peek is so creamy smooth

that it is guaranteed not to mark or abrade even Perspex, Plexiglas or other scratch-sensitive surfaces.

Tarnish, rust stains, limescale deposits, rubber scuff marks, all are easily removed with Peek, making it the ideal multi-surface cleaner.

What's more, its virtually odourless formulation is a pleasure to use and is a real boon where strong cleaning odours are to be avoided.

Peek polish recently received a Best Buy rating from the Daily Mail WEEKEND magazine. It gives impressive results in bathrooms, on pots, pans, and fixtures in the kitchen, on the car for chrome work and wheel hubs - it even removes rust staining from car bodywork without removing the paint. Peek cleans salt water corrosion from garden and other exterior fixtures and further protects against the elements to make future cleaning easier.

Peek is available in retail sizes as a paste in 50g and 100g tubes, 250g cans, and as a liquid in 250ml tins.
